INTRODUCTION

GNS Technologies & Security Solutions LLC started its operations in the year 2014. As a professionally managed organization, we carry out TELECOM, IT, LOW CURRENT & SECURITY SOLUTIONS all over UAE. GNS has assigned qualified & well-experienced expertise to ensure the successful results for our projects. It is GNS's intention to build up sound business relations with our clients on the basis of reliable execution of projects within the specified schedule. We deal with varied range of products & services such as IT solutions for small, medium and enterprise setup. We offer a range of flexible maintenance and support services that can be individually customized for your business to deliver peace of mind in your IT requirements. We undertake annual maintenance contracts for Hardware and Networking.

MISSION

Whenever people are asked a question like **"ARE YOU SURE ?"**, most of the people are worried or confused answering it and even some people get doubts about their answer. That is the reason why we are here!. Our goal is to make you give a right answer in which you don't have any doubts. For that we build a team of professionals who can make sure what is the best way you can enhance a communication in your company, what are all the areas you need to install surveillances, how to prevent yourself from cyber attacks, where to restrict unauthorized access etc., So our mission stands with making our clients **"TO MAKE SURE"** about all the technical stuffs around them.

VISION

"Not all thieves are getting caught until you monitor". We all are living in a digital era where every business and people who are connected with technology are liable to vulnerability. So everyone should make themselves ready to face it. Our vision is always make everyone **"NOT TO FEAR FOR THE THINGS THAT THEY DON'T MONITOR"**. Because we make people to face it with the power of technical security and preventative measures in every aspects where they don't need to keep an eye on everything, instead technology do things for them. So that everyone can say thefts or attacks can be prevented if we use the right technology with the best technical team to defend it.

"SAFETY IS THE FIRST PRIORITY" and no compromise with safety, that is our company policy.

Company safety department has developed and in-house **"SAFETY MANUAL"** which describes the essential safety practices to be followed by every company individual.

A safe workplace starts with employees who follow safety requirements. Implementation of safety practices is also the responsibility of every individual working in the company. Following the good safety practices creates safe working environments.

Delegated Safety Engineers will conduct "Safety refreshing seminar" on regular intervals. Hazard identification will be prepared, reviewed and approved prior to commencing any activity. The copy will be distributed among the craft people who are involved that particular works.

Safety inspection will be conducted for every equipment & machinery and it can be put in service only after obtaining the approval.

QUALITY STATEMENT

GNS Quality control policy is to deliver products & services confirming to quality plans and contract requirements. In order to meet this objective a quality control plan has been developed by the company expertise in accordance with International and local quality standards.

The quality plan outlines the organizational policies, which are established to ensure that all industrial services and construction activities are carried out under controlled conditions. Industrial services shall be in accordance with the specifications, and related International industrial standards.

This quality assurance standard establishes the basis for the quality assurance plans implemented within GNS organization. It states the requirements, assigns the responsibilities and prescribes

the principles governing activities that are the key to quality. Compliance with this standard is mandatory and applies to all company projects.

The overall responsibility for GNS QA/QC program rests with the QA/QC Engineer & designated inspectors. Authority and organizational freedom has given to personnel performing the QA/QC functions.

All company personnel shall adhere to the contents of this QA/QC program and no deviations from the methods set forth herein shall be permitted.

Years of hands-on experience team enables our technology consultants and system Designers to provide immediate suggestions in face-to-face meetings leading to comprehensive turnkey solutions. With a Vision towards **"Leading System Integrator"** we aim to provide complete system integrated solutions with quality products and services to meet the varied needs
Let's dig deeper!

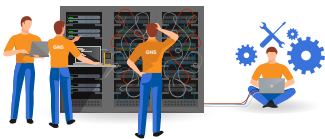

DATACENTRE SOLUTIONS

All enterprises have a plethora of existing enterprise applications & a plan to scale up existing applications, add new applications as their business scale up new horizons. It is a highly strenuous task for any IT administrator to plan hosting of these applications under varied factors like scalability, space, storage capacity, application & usage performance by users, location, etc. Hence planning a Data Center Solutions is a strategic activity that involves functional goals with enterprise applications & users. We use the right technology with the best technical team to defend it.

NETWORK MANAGEMENT & VPN SOLUTIONS

To ensure that your IT functions well, it is important to monitor hardware and software for failures, viruses, online threats, and stay updated as per required maintenance functions. Many businesses use network management services to streamline the IT process and complete their task with more efficiency.

IT RESOURCES

When responsibilities include managing IT, it has now a days become difficult for an organization to manage their own IT Infrastructure. We have sufficient resources filled with professionals and talented who can manage your IT Infrastructure. A company should have a resource management team for the optimal and sustainable utilization of all IT resources.

ENTERPRISE WI-FI

Now it is an era of going wireless. Implementing a WIFI to your organization to be "wire like" performance with powerful edge services secure the network and enhance the user experience.

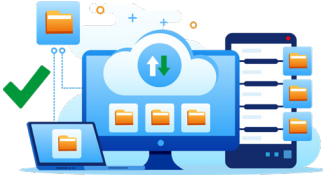

CYBER SECURITY STRATEGY

Prevention is better than cure. Cyberattack has become common now a days. Every fraction of a second there could be an attack from hackers. Planning and implementing a proper cybersecurity will secure your IT assets. Preventing a cyber incident at same time will protect you from hackers.

VOIP

Still hanging with your old phones and paying high bills in your organization. Switch to IP Phones, which brings you lower cost, clear voice quality, branch to branch calling like dialing in same office, complete portability, Higher scalability, Voice mail, web conference etc. VoIP enables soft phone, where you will be extension less, your mobile can act as an extension. You can access your calls from home using soft phones.

BACK UP & DISASTER RECOVERY

Each Data is important to us. Do you have a second plan to keep your Data safe?. We can opt you a backup solution for your organization with professional software based back up, which keeps your data entirely safe.

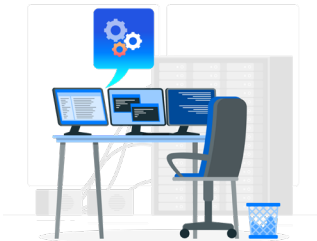

VIRTUALIZATION TECHNOLOGY

Why spend too much on your Datacentres with more hard wares acquiring your space. Move to Virtualized platforms, which can slash your IT expenses, reduce downtime, and enhance resiliency in disaster recovery, increase efficiency and productivity with eco friendly.

COMPREHENSIVE PROTECTION FOR COMPUTERS & DEVICES

It is also important to secure your Endpoints securing along with Network and Datacentre. Hacker can reach out in ways like email and social data. Your data can be stolen which includes your critical data like Banking. Protect your Computers with Secured Endpoint solution to keep you away from strangers.

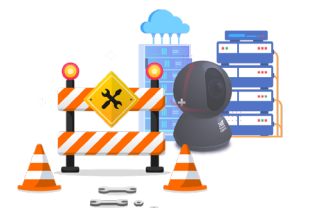

IT INFRASTRUCTURE CONSULTING

Are you doubtful on planning your IT infrastructure? We provide you all the guidelines and a road map for sourcing, utilizing, and managing IT assets and resources We provide the organizations with best practices for using IT solutions and services for your business objectives and in solving your problems.

CLOUD SERVICES

Moving to cloud? our expertise can help you in optimising the journey to cloud there by building your business platform for the future. We support world's leading platform.

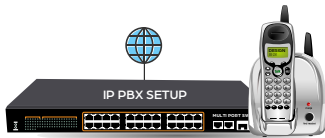

AMC SUPPORT

Worried about your IT Infrastructure issues and support. Good Maintenance is vital. Leave everything to us and sit back, we can take care of Infrastructure that your business owes.

SECURITY & SURVEILLANCE SYSTEMS INSTALLATION & MAINTENANCE

When it comes to the overall safety and security of your business, video surveillance and security cameras are a must, no matter how big or small your business is. One cannot be everywhere to prevent something or find something that has happened before. But installing a surveillance one could gain control over their surrounding and managing all by monitoring it.

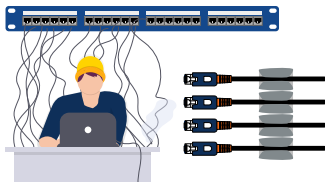

TELECOMMUNICATION SYSTEM

It is an organization's phone system specialized for switching calls among users on local lines. The system also enables these users to share a particular number of external telephone lines. Through VoIP technology, a PBX system gives you the flexibility to add phones and numbers as you bring on more workers. You, therefore, end up saving on costs tied to adding new landlines to your office. In addition, a PBX system can scale up and down with your organization, depending on the season you're in.

ACCESS CONTROL / TIME ATTENDANCE SYSTEM

Access Control Systems allow businesses to have full record of movements in and out of the business premise by logging every individual's entry and exit including the time they arrive and leave. It can help you build layers of security around your business. It provides many benefits including no one can enter without an access, Overcome employee negligence, better tracking for payouts, restrict certain areas of your business off-limits etc.,.

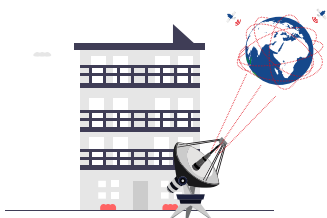

STRUCTURED CABLING

A structured cabling design gives you a comprehensive and well-organized telecommunication infrastructure for businesses and companies, organizations or the government institutions to transmit information, voice, alarm, video or signals through this telecommunication network. Structured cabling cuts out the middleman and allows you to plug in from anywhere in the system. Now, you can save money, increase communication speed and improve business efficiency all in one, simple solution.

VOICE LOGGER

Voice Logger helps in improving customer service by enabling the upper-level management to review the actual telephone conversation with the customer. This automatic voice recording software make it easier for contact center managers to monitor the recorded calls to keep a track of all customer interactions as well agents' performance review. With an advanced contact center call recording in place, they can maintain a database of all the voice calls and monitor and score them based on certain configurable parameters. The voice logs are visible to the supervisors via a GUI-based interface where they can search, download, and perform multi-media operations to listen to and analyze the conversations. Continuous evaluation ensures customer satisfaction and quality management in an organization. Applicable areas include call centers, share traders, security undertakings, banks, hospitals, enquiry departments etc. It ensures customer data privacy by allowing to configure a privilege-based access to call recordings and logs.

SMATV / SATELLITE

Digital Satellite Master Antenna Television (SMATV) is a cost-effective type of TV distribution system which would suit communal properties such as hotels, bars, office blocks, hospitals, or prisons – anywhere that you would want to control the TV channel. Digital SMATV is designed to capture a chosen selection of channels which are then combined onto a coaxial cable distribution system for viewing on a standard Free view Digital TV receiver at the outlets of the system. Reducing a risk of theft avoids installation of set top boxes. Hotels, Resorts, Hospitals, Bars, Apartments, Dormitories, and Prisons SMATV delivers a distributed digital signal throughout your facility and can even include your local off-air channels.

GATE BARRIER

Security is a priority of most businesses. With this in mind whatever the size or nature of your business, Gate barriers will provide an optimum security levels which allows you to control your entry and exit. There are variety of gate barriers to suit each type of business requirement. So it is always recommended to keep the gate secured before any issue arise.

AUDIO RECORDING & COMPOSING

GNS as service provider also do professional Audio Recording for customers. Audio recording is done on professional studio by our professional team. We mainly do audio recording for professional customers who may need voice recorded system mainly for announcement, IVRS system etc. In variant languages. When a customer chooses to pick up the phone, their query is important to them meaning it's vital to create the right first impression with your contact centre IVR. Every production is recorded, edited and mixed with the highest quality standards to ensure the very best sound on every phone system. We'll ensure that your Interactive Voice Response messages and menus are well-designed and implemented, with expertly written IVR scripts and professionally recorded IVR Messages. Working with you, we'll boost the efficiency of your call centre, while helping you gain and retain customers.

INTERCOM SYSTEM

We can say Smart Monitoring. A video door phone lets you see and communicate with the visitor without being physically present on the door. After knowing the purpose of visit and if required, you can choose to open the door or keep it closed. These appliances ensure smart surveillance & home inspection. When coupled with motion-sensors, security systems, and viewing apps, the video door system enables you keep an eye 24X7 notwithstanding whether you're home or not.

UAE TRA APPROVAL

All telecommunications apparatus in the United Arab Emirates (UAE) which connect directly to a public telecommunications network and/or which have an intentional radio wave transmitter are subject to **the Telecommunication Regulatory Authority (TRA)** type approval requirements.

SIRA APPROVED CERTIFICATION

The Security Industry Regulatory Agency (SIRA) was established in 2016 by a decree from HH Sheikh Mohammed Bin Rashid Al Maktoum, Vice President and Prime Minister of the United Arab Emirates and Ruler of Dubai.

SIRA seeks to provide Dubai with the highest levels of safety and security through the implementation of international best practices in security systems, services and guards.
